

USAID
FROM THE AMERICAN PEOPLE

Volunteer Name: Randall Dickey

Country: Kenya

Country project: KE20

Host: Kitui CLMC

Venue: Mwingi, Kenya

Audience:

Number of people :

Date: 11/09/2014

1. Assignment Objectives as in SOW

The Main objective of this volunteer assignment is to build the capacity of CLMC to be more effective and efficient in providing marketing linkages and other information services and support to livestock farmers in Kitui County.

2. Achievement of the assignment objectives

Through multiple meetings and site visits, information was collected and the business strategic plan, along with action steps for the first year was written and left with CLMC.

3. Recommendations to the host with regards to the assignment

Follow the plan and ask for help if you get bogged down!

4. Anticipated Impact

- By following and implementing the strategic plan, the CLMC should realize significant impact for its members by increasing their incomes, which in turn will make it more advantageous to become a member of CLMC while making it easier to pay dues, thereby increasing the CLMC bottom line.

5. Recommended future volunteer Assistance

- A volunteer should be brought to help establish a system for proposal writing so that the membership can seek funding for critical projects in the area.
- Some of the projects will require business plans, so assistance will be required in this discipline as well.

6. Recommendations to other non-host stakeholders

- Helping CLMC identify potential funding sources to whom proposals could be submitted would be outstanding.

7. How can CRS improve future volunteer experience

- This assignment went without a hitch...it would be hard to imagine how CRS could improve on this. Keep up the great work!

Thank You!
